

# BUILD WITH

# THE BENEFIT OF MICROFIBER

- 🚫 Crack resistant
- ⚡ Durable structure
- 🌐 Excellent bond strength

## KEY PRODUCT FEATURES

- A unique premium cement, pre-dosed and pre-homogenised with microfiber, resulting in micro reinforcement of the 'sand-cement' matrix to minimise micro cracks and ensure higher durability
- Efficient air separator to obtain desired Particle Size Distribution, ensuring densest possible 'sand-cement' matrix
- Produced from High Quality Clinker with 48 - 52% C<sub>3</sub>S & low C<sub>3</sub>A content
- Individual components (clinker, gypsum) and fly ash separately fed at the ball mill to blend with high efficiency
- Compatible microfiber blended through a unique dosing system to ensure desired level of performance, backed by prolonged research
- High Quality Electrostatically Precipitated Dry Fly Ash from select sources to comply with the strict quality standards

Choose from our range of over 35 products in:

Cement | Modern Building Materials | Ready Mix Concrete
